## Briefs

Thanks for your purchasing our MIG-V8 switcher. Do hope you can enjoy the experience of the product performance. The design of the switcher conforms to international and industry standards. But if with improper operation, there will be a personal injury and property damage. In order to avoid the dangerous, please obey the relevant instructions when you install and operate the product.

## Trade Mark

- VGA and XGA are the trademarks of IBM.
- VESA is a Video Electronics Standards Association's trademark.
- HDMI、HDMI mark and High-Definition Multimedia Interface are all from HDMI Licensing LLC.
- Even if not specified company or product trademarks, trademark has been fully recognized.

## About The Software

Any acts such as change, decompile, disassemble, decrypt or reverse engineer the software installed in the product are illegal.

# Key Features

---

- 8 PGM outputs, 16 scaled layers at any position
- 8 AUX outputs, support mosaic and scaling
- 3 AUX loop outputs
- 1 Multi-previewer for monitoring the real-time input and output sources, customized window layout
- 1 IP output for real-time monitoring
- 36 optional inputs with various 2K or 4K input modules
- 4K\*2K/60Hz 4:4:4 compliant
- HDCP 1.4 & 2.2 compliant
- Background captures
- EDID management
- Image crop, layer zoom function
- Text overlay
- Edge blending for projector
- F-lock for multiple cascading
- Dual redundant power supplies
- Works with MIG-H8 or MIG-H6

## Safety Instructions

---

- Please use the correct power voltage, ranging 100 ~ 240V AC, 50/60Hz.
- Make sure the power is cut whenever pull out any cable from the machine
- Make sure the power is off and the signal cables are out before you plug in or pull out any hardware device.
- Before you use the product, please cut the power and discharge your static electricity by touching the ground surfaces.
- Please use the machine in clean, dry and ventilated environment. Never use the machine in hot or humid environment.
- Keep the product away from fire, water or any dangerous environment.
- Please do not repair the machine yourself by opening the machine' s box.
- If there is any unusual smell or smoke, please turn off the machine at once and contact the seller.

# Function Profile

## Overview

---

MIG-V8 is the latest Magnimage high-performance video switcher. Based on high-speed FPGA and digital matrix bus structure, it is a 24 bits/60Hz processing system. With an advanced scaling engine, it supports seamless mosaic for up to 16 screens in excellent image quality and low latency. There are 8 PGM outputs, 8 AUX outputs, 3 AUX loop outputs and 1 Multi-previewer.

Mixed input matrix design allows you to customize the machine from 2K and 4Kx2K/60Hz 4:4:4 options. It allows up to 9 input boards.. It also supports real-time video monitoring for input and output.

You can control MIG-V8 via software or console(MIG-H6 or MIG-H8) for fade in/out switching of various layers and presets. This switcher is designed for auto shows, corporate events, product release and live shows.

## Technical Specification

Input signal		
Input	Amount	Standards
VGA	4	VESA
DVI	4	VESA&Custom
HDMI	4	HDMI-1.3
SDI	4	480i、576i、720p、1080i/p (3G SDI)
SDI/VGA	SDI×2、VGA×2	Same as SDI and VGA
SDI/DVI	SDI×2、DVI×2	SDI: 480i、576i、720p、1080i/p (3G SDI) DVI : VESA
HDMI/DP	HDMI×1、DP×1	HDMI2.0、DP1.2, 4K2K/60Hz&Custom
DP	2	DP1.1, 4K×1K/60Hz&Custom

Output signal		
Output port	Amount	Resolution
DVI (PGM)	8	1920×1080/60Hz
DVI (AUX)	8	1920×1080/60Hz
DVI (Multiviewer)	1	1920×1080/60Hz
DVI (AUX loop)	3	1920×1080/60Hz

Power & work condition	
Input power	100 ~ 240VAC, 50/60Hz
Work temperature	0~45°C
Work humidity	10% -90%

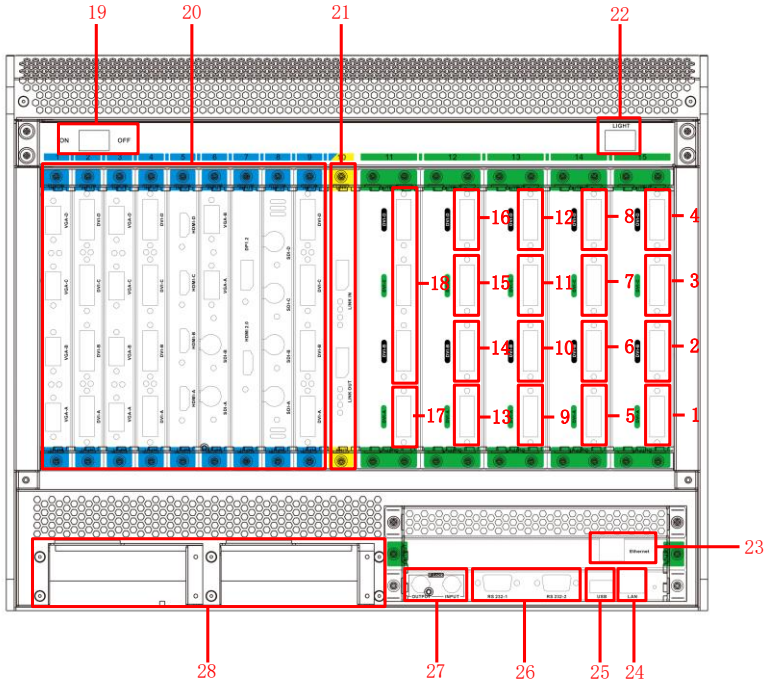

# MIG-V8

## The Front Panel

- 1—Screen: displays the current working status of the machine , can browse input information、 electrical status, etc.
- 2—Function buttons: Under specific menu ,realize customization function
- 3—Main buttons :can browse or set menu contents ,Including OK button ,return button and knob.

# The Back Panel

| 13- PGM output 7 | 27- F-lock for synchronization between multiple units |
| 14- AUX output 7 | 28-Power port   |

# MIG-V8 Board

The control board and output board are included in a standard unit. You can customize the input boards based on your project demand.

The output board has 4 types of output port, including PGM output, AUX output, AUX loop output and Multi-previewer output.

## Control Board

Control Board	
	
F-Lock	F-lock for synchronization between multiple units
RS 232-1/2	Control port for future function
USB	USB port for software upgrading
LAN	LAN port for connecting the software or console

# Output Board

## MIG-V-OUTOSD

DVI port	Port A is Multiviewer output, port B,C,D are AUX loop outputs
----------	---

Output resolution	1920×1080@60Hz
-------------------	----------------

## MIG-V-OUTSW

DVI port	Port A and C are PGM outputs, port B and D are AUX loop outputs
----------	---

Output resolution	1920×1080@60Hz
-------------------	----------------

## MIG-V-OUTIP: [IP monitoring]

Operation mode	This output board is only for sending the real-time input and output image to the software or console
----------------	---

Board explanation	This board is designed for IP monitoring, support monitoring 16 input sources
-------------------	---

# Input Board

MIG-V-INDVI: [DVI×4 input board]

Signal format VESA-DVI-D digital signal, support EDID management

Port 24+5 pin

MIG-V-INHDMI: [HDMI×4 input board]

Signal format EIA/CEA-861, HDMI-1.3

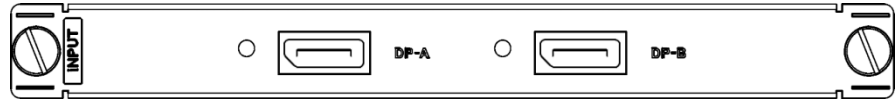

Port HDMI, type A

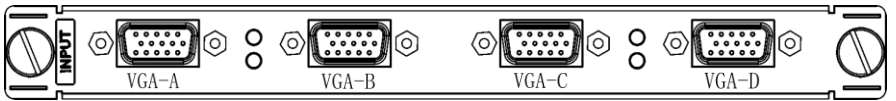

MIG-V-INSDI: [SDI×4 input board]

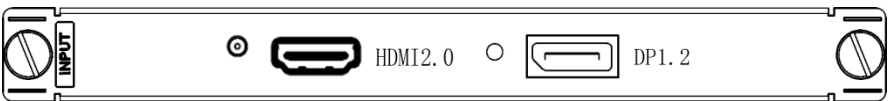

Signal format 480i, 576i, 720p, 1080i/p(3G SDI)

Port BNC

MIG-V-INDP: [DP×2 input board]	
	
Signal format	DP1.1, 3840×1080@60Hz
Port	Full size 20 pin

MIG-V-INVGA: [VGA×4 input board]	
	
Signal format	VESA
Port	15 pin of D-sub

MIG-V-INDP12: [HDMI×1, DP×1 input board]	
	
Signal format	HDMI2.0, DP1.2, 3840×2160@60Hz
Port	HDMI type A and full size 20 pin

MIG-V-INSDIVGA: [SDI×2, VGA×2 input board]	
	
Signal format	2 SDI+2 VGA
Port	BNC and 15 pin of D-sub

MIG-V-INSDIDVI: [SDI×2, DVI×2 input board]

Signal format	2 SDI+2 DVI
Port	BNC and 24+5 pin

## MIG-V8 Menu

The LCD screen of this machine will tell the current information when you do any setting. If there is not any setting or the setting is overtime, the machine will stay in the default status.

### How To Use The Buttons

In the front panel of MIG-V8, there are MENU and FUNCTION sections.

#### MENU

There are "OK" , "  " buttons and one knob in this section.

In the default status, press the "OK" button will enter the main menu. You can rotate the knob and press "OK" to enter the sub-menu setting. "  " is for returning.

#### FUNCTION

There are 10 number buttons in this section. These number buttons are for setting IP address.

# Default Status

After turning on MIG-V8, the screen will show the default window as the below image.

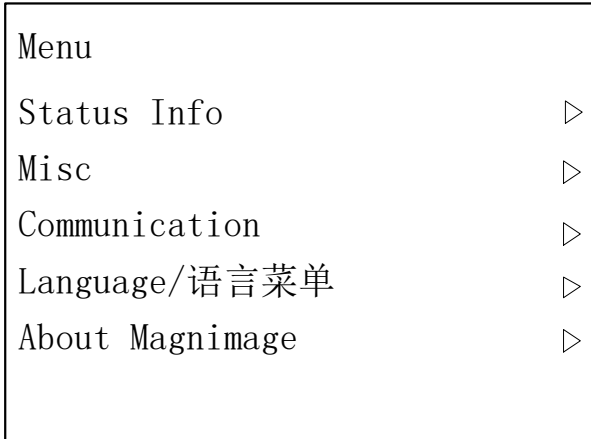

Input & output board	Green part is the output board, blue part is the input board
Input port connection	Turn green when there is available input
Output port connection	Turn orange when there is available output

# MIG-V8 Main Menu

---

Press "OK" button, the LCD screen will enter to this window:

There are 5 setting options. Press "OK" for entering, "↩" for returning.

# Warranty

## The Whole Unit Warranty

---

- One year (from the buying date);
- If the invoice is lost, the 60 days after the production date will be the warranty start date for the product.

## Non-warranty Provisions

---

- The machine soaking and collisions produced besmirch or surface scratches and other abnormal using causes of malfunction or damage;
- Demolition machine or modification, which is not to be agreed by our company;
- Using in the not specified used working conditions, resulting in fault or damage (such as high temperature, low voltage or unstable etc.);
- Force majeure (such as fire, earthquake, etc.) or natural disasters (like lightning, etc) caused the fault or damage;
- Beyond the product warranty.
