-  Support video, picture, NDI, online video inputs
-  Any degree rotation
-  Capture multiple real-time camera signal
-  Page flip for PPT
-  One-key frame still
-  Scene copy
-  Arbitrary grouping for layers

Main features and application

The user-friendly interface

On CREATOR R5's interface, you can access to all the functions and video's output port via its simplified design. Meanwhile, it supports console control and any video format decoding.

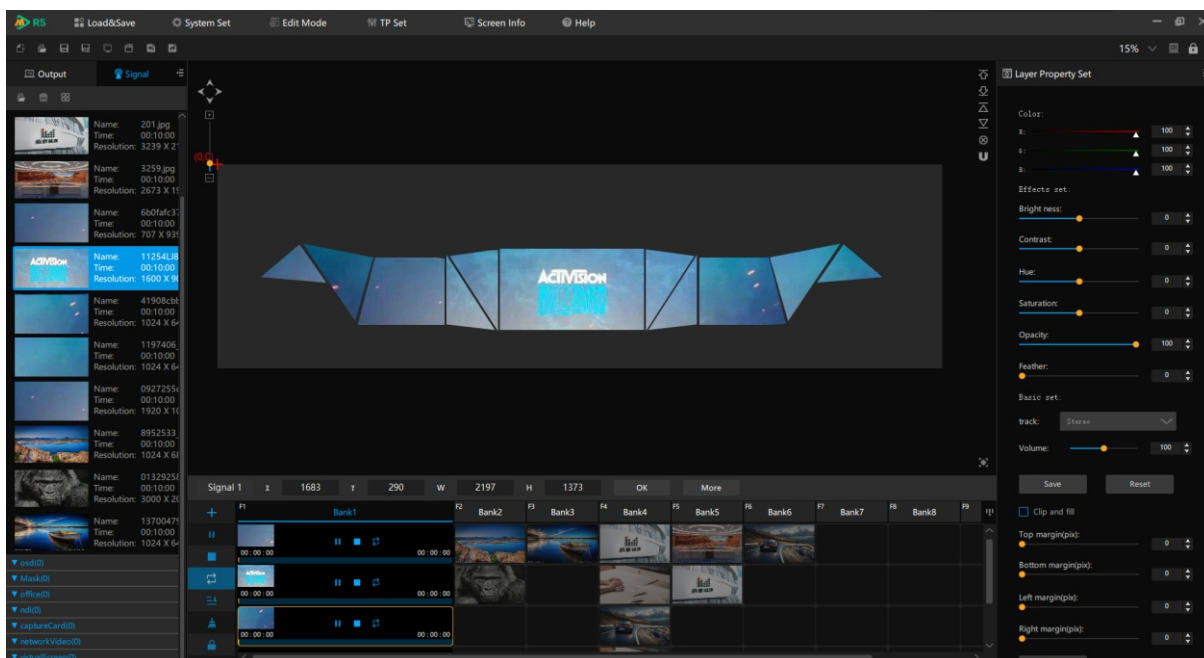

Support various video formats and capture card function

All playback material formats are compatible, including video, audio, picture, PPT, OSD, NDI and network video. It also supports capturing multiple camera signal and PPT page flip for different playing demands.

Wonderful video effect by fast setting and strong function

With the image edit and layer mode operation, you can quickly finish the setting, preview and positioning of multiple video sources. Meanwhile, the software allows further setting, including brightness, mirror, irregular shape and angle select.

Real-time preview function

Support real-time video preview to avoid playing mistakes.

Operating system configuration recommendations

Laptop configuration recommendations

CPU: Intel Core i7-8750H and above

RAM: 8G

Hard disk: 128G+1T

Graphic card: Dual graphic cards (discrete graphics + integrated graphics), recommend GTX1050 and above

Operating system: Windows10 64 bit

Recommended models: Hasee-God of war series and above

Server configuration recommendations

CPU: Intel Core i7-8700&8700K and above; AMD Ryzen 2700&2700X and above

Motherboard: Z370 and above, X370 and above

RAM: 16G DDR4

Hard disk: 500G M.2 NVME

Graphic card: NvidiaQuadro P4000 or the same level graphics card

Operating system: Windows10 64 bit
